 If you have any questions for this document, use the above information to get support on your inquiry.

Last update: 20/12/2023

You are about to purchase a product that is not simple and may be difficult to understand. This Product may not be suitable for all investors. Please ensure that you fully understand the risks involved.

WHAT IS THIS PRODUCT?

CFDs are complex instruments and come with a high risk of losing money rapidly due to leverage. **The vast majority of retail client accounts lose money when trading in CFDs.** You should consider whether you understand how CFDs work and whether you can afford to take the high risk of losing your money.

Type

This Product is a financial instrument of the following category: CFD on Future.

Objectives

A Future CFD is not a listed instrument but is traded as an over the counter contract between you and RED MARS CAPITAL LTD.

A Future CFD enables you to have exposure to price movements on the underlying Future without actually owning the Future. A Future CFD is an agreement between you and RED MARS CAPITAL LTD to exchange the difference in price of the underlying over a period of time. The difference to be exchanged, is determined by the change in the reference price of the underlying. Thus, if the underlying rises in price, and you are long CFD, you receive cash from RED MARS CAPITAL LTD and vice versa. A Future CFD can be bought long or sold short to suit your view of market direction in the future.

A Future CFD is a leveraged product, which requires you to deposit a smaller amount of cash as margin, rather than paying the full value of your exposure. The level of leverage depends on the margin requirement for the individual Future CFD. You will pay an initial margin upfront, when the position is opened. For retail investors, the CySEC mandates a minimum initial margin of 10% of the notional value of the Future CFD and requires RED MARS CAPITAL LTD to liquidate open positions if the qualifying equity (CFD cash and unrealized CFD P&L) in your CFD account falls below 50% of the initial margin requirements for all CFD positions.

Example

If you enter into a buy 5 Future Contracts on S&P500 when the underlying price of S&P500 Future Contract is 2,000USD, the Company will request you to place 100USD as margin with us. If the price of the future contract increases to 3,000USD, your profits will be 5,000USD, minus any relevant costs. If it decreases to 1,000USD you will lose 5,000 USD plus any relevant costs. Depending on whether the Company applies any notifications, when your account is close to margin call, we may ask you for additional funds to ensure your trade/ position remains open, otherwise we may be forced to close your position

Intended Retail Investor

Trading in this product will not be appropriate for everyone. This product would commonly be used by persons who want to generally gain short term exposures to financial instruments/markets; are using (trading with) money which they can afford to lose; have a diversified investment and savings portfolio; have a high risk tolerance; and understand the impact of and risks associated with margin trading.

Term

This product has a pre-defined expiry date. Information about expiry dates can be found under the menu tab Calendar of our [company website](#). Online investors may choose to continue trading in this product, by opening a new contract on the same product, but with a future expiry date (i.e. before the expiration of the current contract). The company reserves the right to unilaterally terminate any contract, the terms of which seem to have been breached.

The spot CFD instrument does not have any maturity date. Nevertheless, failure to deposit additional funds in order to meet margin requirement as a result of negative price movement, may result in the CFD position being auto closed. You will need to have adequate balance in your account in order to avoid any closures on your open positions or reach a stop out.

What are the risks and what could I get in return?

Summary Risk Indicator (SRI)

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the market.

Recommended (required minimum) holding period: None

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money, because of movements in the markets or because we are not able to pay you. We have classified this product as 7 out of 7, which is the highest risk class. This rates the potential losses from future performance at a very high level in poor market conditions. **Be aware of currency risk. When you deal in a CFD, which is denominated in a currency other than the base currency or a currency you have on a deposit in your account with us, all margins, profits, losses and financing credits and debits in relation to that CFD, are calculated using the currency, in which the CFD is denominated. This risk is not considered in the indicator shown above.** In some circumstances, if your account does not contain enough equity to meet applicable margin requirements, your open positions will be liquidated. **The total loss you may incur, may significantly exceed the initial margin requirement, but cannot exceed the equity in your retail CFD account.** You may not be able to close your position easily or you may have to sell at a price, which significantly impacts your realized profit/loss. Markets may fall over night and we may not be able to close out your position at a price, which would avoid losses greater than the margin originally deposited. In addition, if RED MARS CAPITAL LTD is not able to pay you what is owed, you could lose your entire investment. **Please refer to the section below: What happens if Red Mars Capital Ltd. is unable to pay you out?**

Performance scenarios

Market developments in the future cannot be accurately predicted. The scenarios shown are only an indication of some of the possible outcomes based on recent returns. Actual returns could be lower.

The scenarios shown in table 2 indicate how your investment could perform based on historical data. The performance scenarios are estimations of future performance based on past data of the product. This is NOT an exact indicator, performance may vary depending on how the market performs and how long you hold the CFD. The stress scenario illustrates an extreme unfavourable scenario based on historical data. Maximum loss would be the loss of the entire investment. Performance results are net of all product costs, yet it does not account for personal taxation costs. The performance and risks associated with this product depend on a number of factors some of which are determined by the client such as account leverage, utilization leverage and holding period. The assumptions used in the performance analysis are described below

CFD on Facebook Future	Table 1
Investment	€1000
Holding Period	1 Day
Notional Trade Value	€10000
Leverage	10
Margin Requirement	€1000
Margin Used	€1000

Client fully utilizes available margin on trading platform

Scenarios						Table 2
Long Performance Scenario						
Favourable	Balance	€1204.09	Moderate	Balance	€1010.89	
	Return	+20%		Return	+1%	
	Profit/Loss	+ €204.09		Profit/Loss	+€10.89	
Unfavourable	Balance	€815.77	Stress	Balance	€777.55	
	Return	-18%		Return	-22%	
	Profit/Loss	-€184.23		Profit/Loss	-€222.45	
Short Performance Scenario						
Favourable	Balance	€1227.78	Moderate	Balance	€991.51	
	Return	+23%		Return	-1%	
	Profit/Loss	+€227.78		Profit/Loss	-€8.49	
Unfavourable	Balance	€815.84	Stress	Balance	€792.91	
	Return	-18%		Return	-21%	
	Profit/Loss	-€184.16		Profit/Loss	-€207.09	

The above performance scenarios have been calculated using the methodology provided by ESMA

What happens if the RED MARS CAPITAL LTD is unable to pay out?

All Clients' money safeguarded by the Company are held in segregated bank accounts, separately from the Company's own funds, and safeguarded with highly-rated credit institutions in Europe. The Company performs, on a daily basis, internal and external reconciliations as required by the CySEC and prescribed by the rules of MiFID II for the Company to ensure, that it maintains adequate amounts in its Clients' money accounts to cover all Clients' funds.

In the unlikely event, that the Company will be unable to pay you out, the client can contact the Investor Compensation Fund (the "ICF"). The ICF is the Cyprus' statutory fund of last resort for customers of Cyprus Investment Firms ("CIFs"). This means, that the

ICF can pay compensation up to €20,000 per eligible retail client, if the Company is unable to fulfil its financial obligations. An eligible client is considered any retail client (not professional or institutional), irrespective of whether the Company holds his/her funds and/or financial assets. The actual level of compensation, which will be paid out by the ICF, will be based on your claim. The ICF is an independent body, set up under the Investment Services and Activities and Regulated Markets Law of 2017, which the Company is a member of, as it is authorized and regulated by the CySEC (License Number: 396/21).

What are the costs?

The Reduction in Yield ("RIY") shows, what impact the total costs you pay, will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs. The amounts shown here are cumulative costs of the product itself for an estimated holding period of 4 Weeks. The figures assume you invest €2,000 for a €10,000 notional value. The figures are estimates and may change in the future.

Costs Over Time

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs and show you the impact that all costs will have on your investment over time.

Estimated Holding Period	4 Weeks
Investment	€2,000
Notional Amount	€10,000
Total Costs	-€48.20
Impact on Return	-2.41%

Composition of Costs

The table below shows:

- The impact each year of the different types of costs.
- What the different cost categories mean.

One-off costs	Entry costs	0.1%	Brokerage Commissions. This is the most you will pay, and you could pay less.
	Exit costs	0.1%	Brokerage Commissions. This is the most you will pay, and you could pay less.
Ongoing Costs	Swaps	0.0%	Financing costs. Paid on the notional amount based on overnight deposit benchmark. Every Friday this cost multiplies by 3.
	Other on-going costs		Not Applicable

How long should I hold it, and can I take money out early?

Recommended (required minimum) holding period: None

There is no recommended holding period or minimum holding period, though CFDs are intended for short term trading, in some cases intraday and are generally not suitable for long- term investments. Generally, there are no consequences of you choosing to close your position, other than ending your exposure to the underlying at that time.

Early termination may occur in the event your account has insufficient funds to support the margin requirement for your position, as a consequence of certain corporate actions, or if RED MARS CAPITAL LTD for other reasons decides to discontinue the CFD, or if RED MARS CAPITAL LTD were to become insolvent.

You can request to withdraw your money at any time, as long as there are available sufficient funds in your trading account.

How can I complain?

You may submit a complaint through the Company's website [here](#), or send your query along with any supplementary documentation and/or information at complaints@redmars.capital Alternatively, you may send us a letter at 1st Floor Visionhire, Marikas Kotopouli, 3030 Limassol, Cyprus. A copy of the Company's complaint procedure can be found [here](#).

If you are not satisfied with the Company's final decision then you can submit a complaint to the Financial Ombudsman at <http://www.financialombudsman.gov.cy>.

Other relevant information

Additional important documents such as Terms and Conditions, Order Execution Policy, Privacy Policy, Risk Disclosure, Pillar III Disclosures etc. are included [here](#). These are important documents and we strongly recommend, that you familiarize yourself with their content and understand the applicable regulatory framework and conditions of investments, prior to opening an account and start trading with the Company.
